AI Solutions

STATEMENT OF WORK (SoW)

AI-Powered Legal Document Drafting System

For Kandhamal Police, Odisha Police

Document Ref	SDS-SOW-KP-2025-001
Version	1.0 (Draft)
Date	April 2025
Prepared By	Vendor Data Solutions
Prepared For	Kandhamal Police, Odisha Police
Classification	CONFIDENTIAL

1. Executive Summary

Starlight Data Solutions (hereinafter referred to as 'Vendor') proposes an AI-powered Legal Document Drafting System for Kandhamal Police, Odisha Police. This system addresses a critical operational gap — poor quality of Case Diaries and First Information Reports (FIRs) drafted in the field — which has directly impacted the conviction rate in courts.

This Statement of Work (SoW) covers two projects:

Project	Name	Objective
Project 1	AI Case Diary Drafting	Auto-generate legally compliant Case Diaries for Drink & Drive and Excise raids using an AI/LLM model trained on validated Case Diary samples.
Project 2	AI FIR Drafting for NDPS Cases	Auto-generate legally compliant FIRs for Narcotic Drugs and Psychotropic Substances (NDPS) raids using an AI/LLM model trained on validated FIR samples.

Both projects will be delivered as a unified web-based application accessible to all field officers of Kandhamal Police. The goal is to improve documentation quality, increase conviction rates, and ultimately create a safer environment for the general public.

Deployment Method: SaaS Based

2. Background and Problem Statement

2.1 Client Context

Kandhamal Police is a district police unit operating under the jurisdiction of Odisha Police. The district conducts regular law enforcement operations including drink and drive raids, excise raids, and NDPS-related raids. The field officers involved in these operations are required to document their findings in prescribed legal formats — specifically the Case Diary and First Information Report (FIR).

2.2 Identified Problems

#	Problem Area	Impact
1	Inconsistent Case Diary formats across field officers	Documents rejected or not accepted as valid evidence in Indian courts
2	Inconsistent FIR formats for NDPS cases	Cases dismissed or weakened due to procedural non-compliance
3	Lack of standardized templates at the field level	Officers rely on memory or informal guides; documentation quality varies widely
4	Delays in documentation post-raid	Evidence and factual accuracy degraded over time; legal timelines missed
5	No digital tools available for field-level document generation	Officers manually write documents, leading to errors, omissions, and format deviations

These issues directly reduce the conviction rate in Indian courts, allowing offenders to go unpunished. Vendor's solution will eliminate these documentation gaps using AI-driven automation.

3. Scope of Work

3.1 Project 1 — AI-Powered Case Diary Drafting System

3.1.1 Overview

Vendor will design, develop, and deploy an AI-based Case Diary drafting module. This module will generate legally compliant Case Diaries for the following raid types:

- Drink and Drive Raids
- Excise Raids

3.1.2 Data Collection and Model Training

1. Kandhamal Police will provide Vendor with 10 to 15 validated, court-accepted Case Diary copies (anonymized if required) for each raid category (Drink & Drive Raids and Excise Raids).
2. Vendor will analyse these documents to extract required legal structure, language patterns, mandatory sections, and variable data fields.

3. An LLM (Large Language Model) will be trained and fine-tuned on this dataset for each raid category separately, ensuring category-specific accuracy.
4. The trained model will be validated against a held-out set of sample documents for legal language accuracy and format compliance.

3.1.3 Web Application — Case Diary Module

The field-facing web application will provide the following functionality:

- Dropdown selector for raid type: 'Drink and Drive Raid' or 'Excise Raid'
- Dynamic data entry form with the following variable fields (indicative list):
 - Name of the accused person(s)
 - Geo-location of the raid (auto-fill via GPS or manual entry)
 - Date and time of the raid
 - Vehicle number (for drink and drive cases)
 - Quantity and type of alcohol/contraband seized (for excise cases)
 - Name(s) of the raiding officer(s) and witnesses
 - Applicable sections of law (system-suggested based on raid type)
 - Any other relevant incident details
- AI model auto-generates a complete, formatted Case Diary in real time upon submission
- Generated document available for review, edit, download (PDF / DOCX), and print
- All generated documents stored securely in a backend database with officer login details and timestamp

3.2 Project 2 — AI-Powered FIR Drafting System for NDPS Cases

3.2.1 Overview

Vendor will design, develop, and deploy an AI-based FIR drafting module for Narcotic Drugs and Psychotropic Substances (NDPS) cases. This module will cover the following raid categories as defined by Kandhamal Police (2-3 types):

- NDPS Raid Type 1 — to be confirmed with Kandhamal Police
- NDPS Raid Type 2 — to be confirmed with Kandhamal Police
- NDPS Raid Type 3 (if applicable) — to be confirmed with Kandhamal Police

3.2.2 Data Collection and Model Training

5. Kandhamal Police will provide Vendor with 10 to 15 validated, court-accepted FIR copies for each NDPS raid category.
6. Vendor will analyse these documents for required legal language, mandatory clauses under the NDPS Act, applicable IPC/BNSS sections, and variable data fields.

7. Separate LLM models will be trained per NDPS raid category to ensure precise legal language generation.
8. The trained models will undergo internal quality validation before deployment.

3.2.3 Web Application — FIR Drafting Module

The web application will provide the following functionality for NDPS FIR drafting:

- Dropdown selector for NDPS raid type (2-3 categories as finalised with client)
- Dynamic data entry form with variable fields including:
 - Name, age, and address of the accused person(s)
 - Geo-location of the raid
 - Type, quantity, and weight of narcotics / substances seized
 - Vehicle number (if applicable)
 - Names of raiding officer(s) and panch witnesses
 - Applicable sections under the NDPS Act, 1985 and BNSS 2023
 - Seizure memo details and mahazar information
- AI model generates a complete, formatted FIR instantly upon submission
- Generated FIR available for review, edit, download (PDF / DOCX), and print
- Secure backend storage with audit trail of all generated FIRs

3.3 Common Platform Features

Feature	Description
Role-Based Access Control	Separate login for field officers, supervisors, and administrators
Document Preview	Officers can review the AI-generated draft before finalising
Edit & Approve Workflow	Supervisors can review, edit, and approve documents before official use
Multi-format Export	Download as PDF and DOCX; print-ready format
Audit Trail	All actions logged with officer ID, timestamp, and IP address
Secure Data Storage	All data stored on a secure server; access restricted by role
Mobile-Responsive UI	Accessible from smartphones, tablets, and desktop computers
Regional Language Support	Odia language support for field officer ease (optional, Phase 2)

4. Deliverables

#	Deliverable	Description	Phase
1	Data Collection Acknowledgement	Acknowledgement of receipt of Case Diary & FIR training data from Kandhamal Police	Phase 1
2	LLM Training Report	Report covering model training approach, dataset used, and validation accuracy	Phase 1
3	Case Diary Web Module	Fully functional web module for AI-based Case Diary drafting (Project 1)	Phase 2
4	FIR Drafting Web Module	Fully functional web module for AI-based FIR drafting for NDPS cases (Project 2)	Phase 2
5	Unified Web Application	Integrated platform combining both modules with RBAC, audit trail, and export features	Phase 2
6	User Acceptance Testing (UAT) Report	UAT conducted with Kandhamal Police field officers; sign-off document	Phase 3
7	User Manual	Step-by-step guide for field officers and administrators in English and Odia	Phase 3
8	Training and Onboarding	Hands-on training sessions for field officers and admin staff	Phase 3
9	Deployment and Go-Live Support	Production deployment with 30-day hypercare support post go-live	Phase 4

5. Assumptions and Dependencies

5.1 Assumptions by Vendor

- Kandhamal Police will provide 10-15 valid, court-accepted Case Diary and FIR copies per category within 2 weeks of project kick-off.
- All training data provided by Kandhamal Police will be factual, legally valid, and representative of the required format.
- A single point of contact (SPOC) from Kandhamal Police will be available throughout the project for clarification and approvals.
- Internet connectivity will be available at the field officer level for accessing the web application.
- The final output documents will be reviewed by the Legal/Law Officer of Kandhamal Police before use in court proceedings.
- The system is an AI-assist tool; final review and sign-off responsibility rests with the designated police officer.

5.2 Client Dependencies

- Provision of training data (Case Diaries and FIRs) in soft copy (scanned or digital format) within the agreed timeline.
- Availability of Kandhamal Police officers for UAT sessions and feedback cycles.
- Access to server infrastructure for deployment (on-premise or cloud, to be decided jointly).
- Formal written approval from the competent police authority to proceed with data collection and model training.

6. Out of Scope

- Integration with the Odisha Police or national CCTNS (Crime and Criminal Tracking Network & Systems) system — may be addressed in a future phase.
- E-submission of Case Diaries or FIRs directly to courts or government portals.
- Hardware procurement (computers, tablets, mobile devices) for field officers.
- Internet connectivity setup at police stations or field locations.
- Legal validation or certification of AI-generated documents — this remains the responsibility of the designated police officer.
- Any other document type not specified in this SoW (e.g., charge sheets, panchanamas, seizure memos as standalone documents).

7. Acceptance Criteria

#	Criterion	Measurement
1	AI-generated Case Diary matches the legal format of provided samples	>=85-90% structural accuracy validated by Kandhamal Police legal officer
2	AI-generated FIR matches the legal format of provided NDPS FIR samples	>=85-90% structural accuracy validated by Kandhamal Police legal officer
3	Web application is accessible on desktop and mobile devices	Tested and verified on Chrome, Firefox, and mobile browsers
4	Role-based access control works as designed	Field officer, supervisor, and admin roles verified in UAT
5	Document generation time is within acceptable limits	Generated document produced within 30 seconds of form submission
6	UAT sign-off from Kandhamal Police	Formal written UAT acceptance from designated SPOC

8. Sign-Off and Approval

This Statement of Work is subject to review and approval by the authorised representatives of both parties. By signing below, both parties agree to the terms, scope, and responsibilities outlined in this document.
